

Fresh Cheese Stick Loader

Quickly load fragile products, specifically fresh cheese sticks. This model enables flexible film loading and box loading. Versatile modular heads offer quick changeover time for different packaging applications.

- 2 and 3 lane versions available
- Up to 1,000 pieces per minute*
- 98%+ fill rate
- Rapid module changeover loading head
- Touch screen controls
- Conforms to AMI sanitary equipment design principles
- CE approved

*Final output speed is dependent on product specifications and the packaging machine. Guarding may be removed in some images for demonstration purposes.

DRAKE LAUNCHER STYLE AUTOLOADER

MODEL LS-Cheese Stick Loader

Drake's launcher style, open-channel cheese stick loader is the most sanitary, high-speed loader on the market.

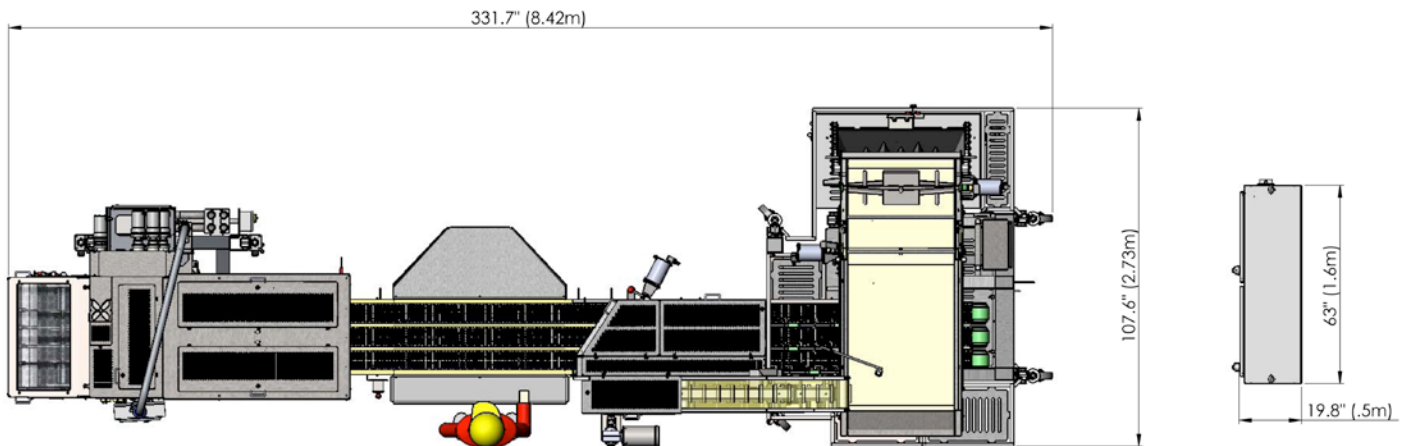

The cheese stick loader offers a compact footprint as well as a design that allows it to be stripped quickly for cleaning. The launcher section uses sanitary food belts that are easily removed during the cleaning process. Drake's cheese stick loader is exceptionally durable and built to withstand severe sanitation procedures.

The unit can handle up to 1,000 pieces per minute of a 127mm (5 inches) long cheese stick and has a 98% fill rate. Drake's cheese loader

can successfully load individual sticks of fresh cheese into individual pockets on a thermoform packaging machine or multiple layers into bulk packages. Blue buckets are used on this autoloader for better contrast with the white cheese.

All Drake autoloaders feature touch screen controls, allowing for the easy addition of new recipes and rapid adjustment to various areas of the loader.

All Drake loaders are proudly made in the USA.
